

Payroll Processing Services

Data Management Payroll Services (DMPS), has been providing payroll processing services to companies of all sizes in all industries since 1962. With its ability to provide the latest technology and highest quality service, DMPS meets the demands that today's accounting departments require. Plus, DMPS offers a unique combination of services at a price that is much lower than you'd expect for such a comprehensive program. DMPS is dedicated to go beyond what you would expect from a payroll company and provides you with a total payroll solution. Whether you process one check or 10,000 checks, DMPS can tailor a program that precisely fits your needs.

Save Time, Save Money

If you're processing your own payroll, Data Management Payroll Services can show you how to save money by letting them do it for you. If you currently have an outside provider, we urge you to compare DMPS's services and prices. Whatever your requirements, DMPS has an innovative business solution to increase your bottom-line performance. They have saved thousands of dollars for our clients and they can help you too.

Payroll/Human Resource System

The Payroll/Human Resource software resides on the Data Management Payroll Service server. With only a PC and an internet connection, you have instant access to our product enhancements – without loading software or running updates.

“24/7” On-line Access

With access to your Payroll/Human Resource information from anywhere in the world, you simply login and start working.

Payroll Tax Filing

DMPS makes all the federal, state, and local payroll tax deposits on your behalf. With your authorization, funds are withdrawn from your company bank account each payroll to make the deposits.

General Ledger Reporting

Efficiently update your general ledger and enjoy complete control over the level of detail you need. Available per payroll or monthly, this report outlines payroll taxes by department.

Direct Deposit

Electronic Funds Transfer to any U.S. financial institution with detailed reporting by pay period – up to 18 account distributions per employee.

Workers' Compensation Reporting

Prepare for your annual comp audit with reports compiled monthly, quarterly, or annually, based on calendar or non-calendar year. With this information, you can virtually eliminate inaccurate premium assessments due to sub-standard audits.

Ability to Print Reports Locally

Choose the configuration best suited for your needs, and gain instant access to your most current payroll data in an easy-to-read file.

Flexible Training

With Data Management Payroll Service's ability to monitor the actions of a client logged onto one of our servers, they provide assistance through the most complicated situations.

Color-Coded Reports

Color-coding helps you search reports easily and quickly, saving you valuable time.

Year-End W-2 Proof List

In December our clients receive a W-21099 Proof List with their final payroll, listing all W-2 information for each employee. Missing information is notated and easily identifiable.
